Docket No.: 04970/000K363-US0

REMARKS

This amendment supplements the amendment of January 15, 2004 in the above-identified patent application. As of the date of that amendment, the application contained Claims 1-16, all of which stood rejected.

In the present amendment, Claim 9 is restored partially to its original form. Originally, this claim had two means-plus-function elements. Through inadvertence, these were amended in the last amendment, rendering Claim 9 identical to Claim 1. The current amendment restores those elements to their means-plus-function form, but maintains other amendments that were made previously. All arguments made in the last amendment are still applicable.
